Did You Know?

When used in conjunction with patient history and a physical exam, Allergenex results offer objective evidence to help:

- Rule in/out atopy as the cause of allergic symptoms
- Select appropriate targeted treatments for allergic or non-allergic rhinitis
- Identify specific allergic triggers
- Implement targeted exposure reduction methods
- Easy to use
- Zero risk of anaphylaxis
- Patients do not need to stop medications
- Test done with a simple finger prick

1. Lancet Patient Finger

2. Apply Blood to Card

Why use Allergenex?

Point of service collection using a finger prick
that requires only four blood spots

Comprehensive national panel of inhalant
and food allergens

Available to all patients ages 6 months and up

Timely, objective clinical information displayed
in a concise, graphical format

Covered by most insurance plans

Please see your doctor about ordering
the Allergenex test today!
